10 - Searching & Sorting

Ex. No.: 10.1 Date: 05.06.2024

Register No.: 231501104 Name: Mounesh Kumaran K R

.

Merge Sort

Write a Python program to sort a list of elements using the merge sort algorithm.

For example:

| Input | Result |
|------------|--------|
| 5 65438 | 34568 |

Program:

```
a=int(input()) l=[]
l.extend(input().split()) for i
in range(a-1):
    for j in range(a-1):
        if(int(I[j])>int(I[j+1])):
        t=int(I[j])
        I[j]=int(I[j+1])
        I[j+1]=t
for i in range(a):
    print(int(I[i]),end="")
```

Output:

| | Input | Expected | Got |
|---|---------------------------------|----------------------------|------------------------|
| ~ | 5 6 5 4 3 8 | 3 4 5 6 8 | 3 4 5 6 8 |
| ~ | 9 14 46 43 27 57 41 45 21 70 | 14 21 27 41 43 45 46 57 70 | 14 21 27 41 43 45 46 5 |
| ~ | 4 86 43 23 49 | 23 43 49 86 | 23 43 49 86 |

Passed all tests! 🗸

.

Bubble Sort

Given an listof integers, sort the array in ascending order using the *Bubble Sort* algorithm above. Once sorted, print the following three lines:

- 1. List is sorted in numSwaps swaps., where numSwaps is the number of swaps that took place.
- 2. First Element: firstElement, the *first* element in the sorted <u>list</u>.
- Last Element: lastElement, the last element in the sorted <u>list</u>.

For example, given a worst-case but small array to sort: a=[6,4,1]. It took 3 swaps to sort the array. Output would be

Array is sorted in 3 swaps. First

Element: 1 Last Element: 6

Input Format

The first line contains an integer, n, the size of the <u>list</u> a. The second line contains n, space-separated integers a[i].

Constraints

- · 2<=n<=600
- · 1<=a[i]<=2x10⁶.

Output Format

You must print the following three lines of output:

- 1. <u>List</u> is sorted in numSwaps swaps., where numSwaps is the number of swaps that took place.
- 2. First Element: firstElement, the *first* element in the sorted <u>list</u>.
- 3. Last Element: lastElement, the *last* element in the sorted list.

Sample Input 0

3

123

Sample Output 0

List is sorted in 0 swaps.

First Element: 1

Last Element: 3

For example:

| Input | Result |
|------------|---|
| 3 3 2 1 | List is sorted in 3 swaps. First Element: 1 Last Element: 3 |
| 5 19284 | List is sorted in 4 swaps. First Element: 1 Last Element: 9 |

Program:

```
def bubble_sort(arr): n
  = len(arr) swaps = 0
  for i in range(n):
       for j in range(0, n-i-1): if
            arr[j] > arr[j + 1]: #
                Swap elements
           arr[j], arr[j + 1] = arr[j + 1], arr[j] swaps += 1
  return swaps
# Input the size of the list n =
int(input())
# Input the list of integers
arr = list(map(int, input().split()))
# Perform bubble sort and count the number of swaps num_swaps =
bubble_sort(arr)
```

Print the number of swaps
print("List is sorted in", num_swaps, "swaps.")
Print the first element print("First
Element:", arr[0])
Print the last element print("Last
Element:", arr[-1])

Output:

| | Input | Expected | Got | |
|----------|----------------|---|---|---|
| ~ | 3 3 2 1 | List is sorted in 3 swaps. First Element: 1 Last Element: 3 | List is sorted in 3 swaps. First Element: 1 Last Element: 3 | ~ |
| ~ | 5 1 9 2 8 4 | List is sorted in 4 swaps. First Element: 1 Last Element: 9 | List is sorted in 4 swaps. First Element: 1 Last Element: 9 | ~ |

Correct

.

Peak Element

Given an list, find peak element in it. A peak element is an element that is greater than its neighbors.

An element a[i] is a peak element if

 $A[i-1] \le A[i] \ge a[i+1]$ for middle elements. $[0 \le i \le n-1]$ A[i-1]

<= A[i] for last element [i=n-1]

A[i]>=A[i+1] for first element [i=0]

Input Format

The first line contains a single integer n, the length of A. The second line contains n space-separated integers, A[i].

Output Format

Print peak numbers separated by space.

Sample Input

5

891026

Sample Output

106

For example:

| Input | Result |
|----------|--------|
| 4 | 12 8 |
| 12 3 6 8 | |

Program:

def find_peak(arr):

peak_elements = []

```
# Check for the first element if
  arr[0] >= arr[1]:
     peak_elements.append(arr[0])
  # Check for middle elements for i
  in range(1, len(arr) - 1):
     if arr[i - 1] <= arr[i] >= arr[i + 1]:
        peak_elements.append(arr[i])
  # Check for the last element if
  arr[-1] >= arr[-2]:
     peak_elements.append(arr[-1])
    return peak_elements
# Input the length of the list n =
int(input())
  # Input the list of integers
arr = list(map(int, input().split()))
# Find peak elements and print the result
peak_elements = find_peak(arr) print(*peak_elements)
```

Output:

Ex. No.: 10.4 Date: 05.06.2024

 $\label{eq:Register No.: 231501104} \textbf{Name: } Mounesh \; Kumaran \; K \; R$

Binary Search

Write a Python program for binary search.

For example:

| Input | Result |
|-------------------|--------|
| 12358 | False |
| 3 5 9 45 42 42 | True |

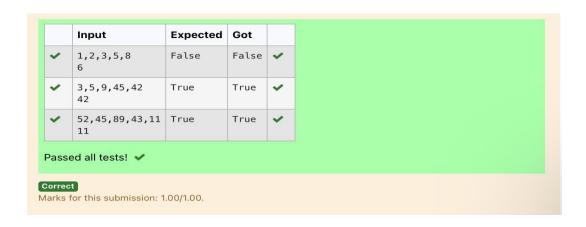

Program:

a = input().split(",")

b = input() print(b

in a)

Output:

Ex. No.: 10.5 Date: 05.06.2024

 $\label{eq:Register No.: 231501104} \textbf{Name: } Mounesh \; Kumaran \; K \; R$

.

Frequency of Elements

To find the frequency of numbers in a list and display in sorted order.

Constraints:

1<=n, arr[i]<=100

Input:

1687949068145

output:

12

42

5 1

68 2

79 1

90 1

For example:

| Input | Result |
|--------|--------|
| 435345 | 3 2 |
| | 4 2 |
| | 5 2 |

Program:

def count_frequency(arr):

frequency = {}

Count the frequency of each number in the list for num

in arr:

```
frequency[num] = frequency.get(num, 0) + 1
# Sort the dictionary based on keys
sorted_frequency = sorted(frequency.items())
```

Print the frequency of each number for
num, freq in sorted_frequency:
 print(num, freq)

Input the list of numbers
arr = list(map(int, input().split()))

Count the frequency and print the result count_frequency(arr)

Output:

| | Input | Expected | Got | |
|----------|--------------------|------------|------------|---|
| ~ | 4 3 5 3 4 5 | 3 2 4 2 | 3 2 4 2 | ~ |
| | | 5 2 | 5 2 | |
| ~ | 12 4 4 4 2 3 5 | 2 1 | 2 1 | ~ |
| | | 3 1 | 3 1 | |
| | | 4 3 5 1 | 4 3 5 1 | |
| | | 12 1 | 12 1 | |
| ~ | 5 4 5 4 6 5 7 3 | 3 1 | 3 1 | ~ |
| • | 3 4 3 4 6 3 7 3 | 4 2 | 4 2 | • |
| | | 5 3 | 5 3 | |
| | | 6 1 | 6 1 | |
| | | 7 1 | 7 1 | |
